

MP2005A Amplifier Volume Controller

Features

- Remote Amplifier Volume Controller
- Rated output 5W/4Ω (distortion 10%)
- Output sensitivity: 10kΩ, 300mV (±10%), unbalanced
- Provided with power switch, capable of independent control of volume

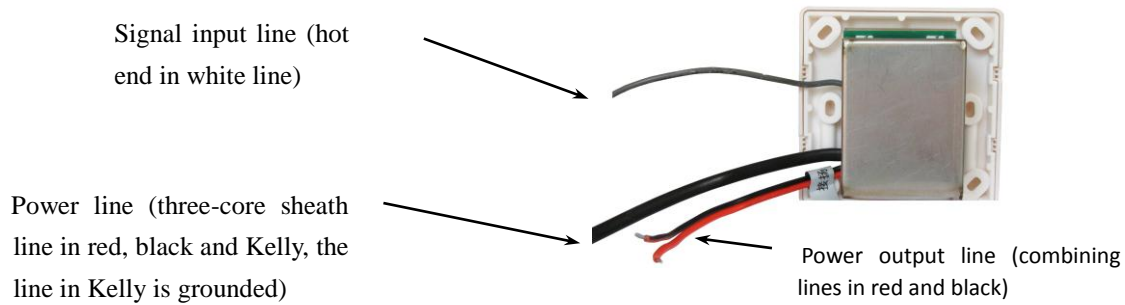

Specification

Model	MP2005A
Rated output	5W/4Ω (distortion 10%)
Output sensitivity	10kΩ, 300mV (±10%), unbalanced
Frequency response	80Hz-18kHz (±3dB)
Harmonic distortion	<1% (1kHz, 1/3 rated output voltage)
Signal to noise	> 70dB
Protection	AC fuse, short circuit protection
Power supply	AC220-240V/50Hz
Power consumption	8W
Size of panel (L×W×H)	86×86×68mm
Installation size of base box (L×W×H)	78×78×50mm
Net weight	0.2kg

How to install:

1. Connect the signal input line with the sound source (white represents hot signal end), connect the power output line with the speaker (red +, black -), and connect power line with AC 220V power supply in a safe manner (see figure below);

Warning: It is prohibited to connect AC220V power supply to signal input line or power output line!

2. Apply force outwards from the buckling position at the main body of the part to take off from the face frame;
3. After checking the lines for perfect connection, push the main body of part carefully into installation base box, lock up with screws, buckle face frame;
4. Turn volume knob to adjust the volume as required. In case of long-term idling, please turn volume knob to “**OFF**”, to shut off the power supply.
