

DS-1508

2W Dual-way Intercom System

Description

The intercom host has an intercom dedicated speaker and 37cm metal microphone, more convenient to realize free two-way intercom with the extension. It adopts aluminum alloy metal wire drawing process for the surface and metal hose for the microphone, beautiful and durable.

The new high-power extension is made of ABS material with silver border, available in black and silver. The 2W extension has a loud speaker and good pickup microphone. The rear of the extension is designed with mounting holes, which can be attached to the glass with double-sided tape or hung up, easy for recycling and storage.

It is applicable to banks, hospitals, stations, restaurants and booking offices.

Features

- Realistic voice, adjustable internal and external volume.
- Streamlined built-in extension, small in size, internal and external connection using a 4-pin cable of high-strength tensile, fully shielded aluminum foil wire with stronger anti-interference, used with stainless steel wire protection tube.
- With microcomputer processing circuit, and static noise function for echo and howling.
- With independent switch function, the internal and external volume can be adjusted or turned off separately.
- With an extension behind the host, with recording, power, internal microphone and other interfaces.
- The recording interface is an analog output port, used to connect a Digital Video Recorder/NVR to achieve third-party synchronous recording.

Specifications

Model	DS-1508
Product Name	Dual-way intercom system
Installation Method	Desktop
Working Voltage/Current	DC9V/300MA
Host Output Power	2W
Host Dimension	Space aluminum alloy panel+Plastic base 155*95*45mm (MIC: 42cm in length)
Extension Output Power	2W
Extension Dimension	2W-Plastic, ϕ 68*20mm
Gross Weight	0.8KG
